Surefox™

Surefox Protective Shooting Course (PSC)

Surefox's Protective Shooting Course (PSC) is a progressive, pistol-focused, two-day shooting program that will exponentially improve the skill of the average shooter.

Throughout our two day course we emphasise the basics while building on new skills, culminating with multiple client based live fire scenarios. We start with the fundamentals of marksmanship, if we don't understand and master the basics then our foundation is weak. Then we dive into the shooter's solution; proper mindset, ammo management, malfunctions, immediate threats, shot placement, shooting while moving, multiple target engagements, barricades, shooting around vehicles, and shooting around your client.

We stress accuracy first...speed will come with continued training.

Surefox

Surefox Protective Operations Certification Course (POCC)

Graduates of this course are trained to quietly operate within our client's environment seeking an optimum balance of being seen & unseen.

Our executive protection agents receive professional instruction and mentorship at Surefox's own Protective Operations Certification Course (POCC) where agents are required to demonstrate competency through realistic practical exercises that aim to bring all agents to a common level of proficiency on security-related hard and soft skills.

Training Includes:

➔ **Surefox Values, Professionalism, Standards of Conduct**
➔ **Customer Service**
➔ **Elicitation**
➔ **Verbal De-escalation and Defensive Tactics (D-TAC)**
➔ **Residential Security Operations**
➔ **Executive Protection Operations**
➔ **Surveillance and Counter-surveillance**

➔ **Command Post Operations**
➔ **Surveillance and Counter Surveillance**
➔ **Observation, Documentation and Report Writing**
➔ **Vehicle and Motorcade Operations**
➔ **Advances and Advance Reports**
➔ **Surefox Physical Agility Test (SPAT)**
